

Research Checklist

Reference Guide

Ultimate AI Research Toolkit 2026 - Premium Edition

Designed for PhD students, professors, graduate researchers, engineers, and data scientists.

[Idea]	Research prompts and ideation systems
[Review]	Literature synthesis and gap detection
[Write]	Paper writing and revision workflows
[Plan]	Publication and productivity operations

4. Summary

Introduction

Operational checklist for planning and running rigorous research programs.

Instructions

- Mark each item as Complete, In Progress, or Not Applicable.
- Attach evidence where possible for auditability.

Checklist

- ☐ Research questions are specific, testable, and decision-relevant.
- ☐ Hypotheses include measurable success and failure criteria.
- ☐ Data sources are documented with provenance and access constraints.
- ☐ Baseline and ablation strategy approved before experiments begin.
- ☐ Reproducibility protocol includes seeds, versions, and environment notes.
- ☐ Risk log includes data quality, bias, and timeline failure points.
- ☐ Decision checkpoints are linked to objective metrics.
- ☐ Milestones include writing and revision windows, not only experiments.

Summary

Execution discipline and explicit controls improve both speed and research credibility.
